Serhii Maksymchuk

serg.maximchuk@gmail.com

Senior Software Engineer / Tech Lead

Location: Kyiv, Ukraine

Key Areas of Expertise

- Software architecture, design, implementation and delivery
- AI-powered products and LLM assistants
- Development and support of crypto trading platforms

Technical Skills

- TDD/BDD
- Backend: Java, Kotlin (Spring Boot, Spring AI, Hibernate)
- Frontend: TypeScript (React)
- DB: PostgreSQL (pgvector), MySQL, MongoDB, Redis
- Cloud: AWS (ECS, SQS, SNS, RDS)
- CI/CD: GitLab CI/CD, GitHub Actions
- Docker, Terraform
- Microservices, Kafka, design patterns, SOLID
- AI: Spring AI, OpenAI API, RAG

Work Experience

Software Engineer | Co-Founder — Aug 2025 – Present

Spilki

Co-founded and built an AI sales assistant for small businesses that answers customers 24/7 in Instagram, Telegram and a website widget, takes orders and books appointments directly in the business's CRM.

- Designed the system architecture, built the backend on Kotlin and Spring AI and the frontend on TypeScript
- Built a RAG pipeline over each business's price lists and brand guidelines
- Integrated messaging channels and CRMs
- Implemented conversation tracking with conversion analytics
- Set up AWS infrastructure with Terraform

Kotlin, TypeScript, Spring AI, OpenAI API, RAG, Terraform, AWS (ECS, SQS, SNS, RDS PostgreSQL with pgvector)
https://spilki.app

Software Engineer | Founder — Aug 2023 – Jun 2026

ColdWallet

Built an open-source, privacy-first portfolio dashboard delivered as Front-end as a Service (FEaaS): it runs entirely in the browser, data is encrypted locally and never leaves the device. Integrations with MetaMask, Binance, OKX, Monobank and other exchanges via CCXT, plus manual entry for any asset. Issued the CWT token on Ethereum and BSC.

React, TypeScript

Tech Lead — Jan 2020 – Jul 2025

Senior Java Developer — Nov 2018 – Jan 2020

Prof-IT Blockchain

Built a centralized crypto exchange (spot trading, matching engine, market-making, liquidity provider) handling up to hundreds of thousands of orders per second, across the full SDLC, first as a senior developer, then as tech lead.

As tech lead, owned the technical side of the product from planning and design to development and delivery:

- Led a team of up to 10 people: backend and frontend developers, DevOps and QA
- Made architecture and technology decisions
- Planned and estimated work with the business, set priorities and drove releases to production
- Owned system performance and security
- Handled production incidents
- Set engineering standards: code review, coding conventions
- Interviewed candidates, onboarded and mentored developers
- Coordinated, supported and reviewed work across all teams

As a developer:

- Designed and developed core exchange services
- Integrated internal components and third-party APIs
- Implemented blockchain listeners
- Set up and maintained CI/CD

Java, Spring Boot, Kafka, MySQL, MongoDB, Redis, REST, JSON-RPC over WebSocket, GitLab CI/CD, macroservices, microservices

Full Stack Developer — Apr 2017 – Oct 2018
Junior Software Engineer — Oct 2015 – Apr 2017
Ubrainians

Full stack CMS development (open source: github.com/imCodePartnerAB/imcms).

- Developed both client and server side
- Redesigned old server side, DB schema and full-text search (Solr)
- Moved from Servlets to Spring MVC
- Introduced automated testing (JUnit, Mockito) and TDD
- Designed and implemented asynchronous module loader (AMD) in pure JS
- Rebuilt the client from scratch using BEM, with a server-side presentation layer for it
- Added WYSIWYG text editor

Java, Spring (MVC, Data, AOP), Hibernate, Solr, MySQL, JUnit, Mockito, JS

Languages

- Ukrainian – native
- English – Advanced (C1)

Education

NTUU "KPI" — 2010 – 2016
Automation Systems Engineer

Specialist degree (Master's equivalent)

Summary

Software engineer and tech lead with 10+ years of experience in Java backend, from architecture to production. Led development of a crypto exchange (spot trading, matching engine, market-making) and now build AI-powered products. I enjoy taking ideas from zero to a working product — Spilki and ColdWallet are two I've founded and shipped.
